

## Peninsula Health Center Abatement

Complete removal of friable asbestos in very tight quarters.

## Asbestos Abatement

### Details:

- Owner: City of Newport News
- General Contractor: City of Newport News
- Project Name: Peninsula Health Center
- Location: Newport News, VA

### Description:

Abatement of the Peninsula Health Center in Newport News, VA, required full removal of fire-stopping, sprayed, friable asbestos insulation, while under full negative pressure containment. The area was located 18 feet above floor level on top of custom scaffolding, also installed by Macsons. Containing the area necessitated building over and around the fully operational mechanical room that services the center. All abatement activities were conducted while the mechanical space below was left accessible to service personnel. Negative pressure was maintained at all times. The work was completed during multiple shifts to ensure that the building occupants had no exposure during load out of hazardous material.
